UTeach CS Principles Results

Around 100 classrooms piloted UTeach CS Principles in 2016–17, the first year the College Board offered the AP CSP exam. Overall, 83% students in UTeach CSP passed—earning at least a score of 3 out of 5—versus 74% in the nation.

An explicit aim of UTeach CS Principles is to broaden participation in CS among girls and other traditionally underrepresented students, and those groups also outperformed their peers across the country. Female and male students did equally well in UTeach CSP, with 83% passing, while nationally only 70% of females passed.

Percentage of All Students and Female Students Passing the AP CS Principles Exam

Among underrepresented minority students, 15% more passed if they took UTeach CSP. At the same time, the percentage of female students (31%) and underrepresented minorities (22%) enrolling in UTeach CSP were nearly the same as the percentage enrolling nationally (30% and 26%, respectively).
